

## Peptide Plus Moisturizer Anti-Aging Complex

*NuCerity Pure Peptide Plus Moisturizer is an amazing anti-aging complex that delivers instant hydration to help smooth and enhance skin tone, and reduce the look of fine lines and other visible signs of aging. Luxurious natural emollients effectively enrich aging skin and help rebuild the skin's moisture content for a healthier, younger-looking appearance.*

### Brightens and Revitalizes Dry Skin

NuCerity Pure Peptide Plus Moisturizer is a silky, oil-free, fragrance-free formula that absorbs quickly for smoother, more radiant skin. Peptides, along with shea butter, aloe, vitamin E, and hyaluronic acid help create this intense hydrating complex. Peptides make up the building blocks of the essential structural proteins that keep your skin firm, healthy and youthful looking. The aging process, as well as environmental influences, naturally break down your skin's ability to reproduce these beautifying proteins. NuCerity Pure Peptide Plus Moisturizer replenishes the skin's supply of peptides, restoring your peak appearance in the process..

### Key Benefits

- Natural emollients enrich aging skin
- Peptides promote regeneration of structural skin proteins
- Shea butter is an effective moisturizer containing many fatty acids assisting in skin elasticity as well as protecting the skin from environmental and free-radical damage
- Hyaluronic acid's natural water-maintaining properties improve vital nourishment absorption to help plump and firm the skin
- Aloe helps facilitate natural exfoliation and clean clogged pores improving your skin's tone and appearance

### Directions

After washing the face in the morning and at night, apply a generous amount covering the entire face while avoiding the immediate eye area. Provides an excellent moisture foundation under Skincerity and can be used under makeup. Also good for neck and chest.
